

MYKE XARDAN BOGNALON

FULL-STACK DEVELOPER

Mandaluyong, Metro Manila | +63 915 902 4439 | mykexardantorresbognalon@mail.com | github.com/Rylaii | portfolio-myke-v2.vercel.app

Full-stack developer with 3+ years of experience contributing to a production microfinance platform. Works across Angular UI, .NET/C# APIs, SQL Server and MongoDB data workflows, reporting, API integrations, AWS CI/CD, and production troubleshooting. Currently contributing to a legacy .NET 2 to .NET 10 modernization and a full UI redesign.

PROFESSIONAL EXPERIENCE

KMBI - DUNAMIS Kabalikat2023 - Present

Junior Backend Developer (Full-Stack Responsibilities)

- Develop and maintain REST APIs and backend services in .NET/C# for core microfinance workflows.
- Build and enhance Angular interfaces, contributing to a full UI modernization with reusable, responsive patterns across major modules.
- Work with SQL Server and MongoDB for querying, stored procedures, backend integration, data troubleshooting, and application workflows; use Entity Framework and Dapper where appropriate.
- Create and maintain operational and financial reports using Stimulsoft, plus Excel generation and export workflows using EPPlus.
- Document, test, and validate APIs with Postman; integrate internal and external services and support real-time workflows with SignalR.
- Support AWS CI/CD deployments and staging environments, and troubleshoot frontend, backend, database, configuration, reporting, and deployment issues.
- Contribute to the modernization of a legacy .NET 2 application to .NET 10 through dependency updates, compatibility fixes, and legacy-code refactoring.

SELECTED WORK

DUNAMIS Kabalikat Enterprise Microfinance Platform Internal Production system supporting client, loan, collection, reporting, notification, and branch-level workflows across a multi-layer Angular + .NET architecture.	Scholarship Management System Full-Stack Web Application Built a scholarship application and administration workflow with student submissions, application tracking, review tools, and database-backed records management.
